Road Widening / Shoulder Paving

P.D. Excavations is equipped with two road wideners, capable of placing material on road shoulders up to 3 metres wide. Automated machine controls are fitted to ensure precise placement of material to exact customer specifications.

Road wideners are ideally suited for placing material on **road shoulders** on long stretches of road but can also be used for filling trenches and backfilling kerbs.

Our road wideners leave **no excess material on the road** bitumen removing public safety issues and reducing costs. The road wideners are cost effective and highly efficient.
