Non Destructive Digging — Vacuum Excavation Underground service location Ground Penetrating Radar

P.D. Excavations provides *underground service locations* and *vacuum excavation* in South Australia.

Non Destructive Vacuum Excavation has many versatile uses including:

- Safely locating underground services. (Fibre optic, Gas, Water, Comms)
- Sludge removal
- Stormwater drain / culvert cleaning
- Removal of material in confined spaces
- Sign & Fence post hole digging
- Locating pipes for repairs
- Pit cleaning
- Material / Debris removal

Matching hydro excavation equipment, survey quality GPS, underground service locating equipment and **Ground Penetrating Radar**. P.D. Excavations can safely locate underground services and provide survey coordinates, depth, diameter and type for each located service.
